

YUKTIX GREENSENSE

Cultivating Ideas for Better Yield - Using Yuktix GreenSense

SAVE WATER, LESS PESTICIDES USAGE & REDUCE WASTAGE

Sensor-based Agri-intelligence devices to assist growers in increasing crop yield by reducing input usage and crop loss.

20% INCREASE IN YIELD

15% LESS WASTAGE

40% LESS FERTILIZERS

40% WATER SAVING

THE BEST WAY TO MONITOR YOUR FARM & CROPS

Use Next-Generation IoT Devices to Increase Yield & Reduce Losses

GREENSENSE

Real-time Weather Data

Soil Moisture Monitoring

Disease Prediction

Micro & Macro Soil Nutrient Testing

Fertilizers Recommendations

Image Analysis

4 MAJOR BENEFITS

1

20% INCREASE IN YIELD

On-farm Micro-weather monitoring and timely scientific advisory services from the Yuktix platform.

2

15% WASTAGE REDUCTION

Advanced disease prediction models and alert mechanism to prevent susceptible crop damage

3

40% LESS FERTILIZERS

Yuktix farm-specific advisory services is integrated with advanced soil moisture sensors which are configured specific to crop growth stages.

4

40% WATER SAVING

With next-generation soil Volumetric water content sensor, plan your irrigation and save up to 40%
